

IMPORTANT

GM Single Mass Replacement Flywheel P/N's 700105, 700174 & 700175

Expect increased transmission gear rattle/noise when converting from the O.E. Dual Mass Flywheel to an aftermarket one-piece (Single Mass) flywheel. Centerforce recommends using a sprung-hub disc in conjunction with any Single Mass flywheel.

IMPORTANT NOTICE:

When replacing your factory Dual-Mass flywheel with a Centerforce Single-Mass flywheel, use the supplied six (6) crank bolts and torque to specification or purchase aftermarket bolts which are listed below.

ARP Pro bolt P/N: 200-2802

ARP Hi Performance Bolt P/N: 100-2801

GM Factory Bolt P/N: 12337973
